

AMERICAN LIGHTING

For both commercial and residential applications, this 6-inch LED downlight saves 83 percent in operating costs versus incandescent versions. It can be installed easily and is fully dimmable with most incandescent controls. Delivering just under 50 lm/W, it comes in two styles that are compatible with any medium- or GU24-base housing. The color temperature is 2500K for a warm white light.

CREATIVE SYSTEMS LIGHTING

The 3-inch Eco-Downlight LED is adjustable and allows for light to be focused or positioned in any setting, even after installation. Equal in performance to a 50-watt system, it only uses 16 watts. The ICAT-rated adjustable fixture includes an integral proprietary LED driver, adjustable heat sink, electronic low-voltage dimmer, and a 50,000-hour life rating. It may be ordered in warm or natural white light.
